SECTION 4. FIRST-AID MEASURES

General information:
Spontaneous penetration of butadiene rubber into human organism is impossible.
If heated over 300 °C rubber thermo destruction is possible.
Butadiene rubber при is a stable product under normal conditions. Non-volatile, causes non-exhaustive effects. Inhalation poisoning is unlikely.
Contact with eyes may cause mechanical damage.
Contact with skin has no effects.

Inhalation:
Move any exposed person to fresh air at once. Keep warm and at rest. If there is respiratory distress give oxygen. If respiration stops or shows signs of failing, apply artificial respiration. Get medical attention.

Ingestion:
Wash out mouth with water and give plenty of water to drink, provided person is conscious. Do not induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. If vomiting occurs naturally, have the exposed person lean forward. Get medical aid.

Skin contact:
Remove contaminated clothing and wash skin with plenty of running water, under a shower if affected area is large enough to warrant this. Get medical attention.

Eye contact:
Rinse immediately eye with plenty of low pressure water for at least 15 minutes.
Remove any contact lenses. Get medical attention.
